

Eloïse Faure

Cloud & DevOps Architect

About me

I am a dev who turned devops.

As a consultant and then DevOps architect at Red Hat I began my path to the Ops side. Naturally I completed my range of existing skills in dev and CI by pushing my way through new subjects like infrastructure, cloud, automation, orchestration, security, high availability, monitoring, performance...

I appreciate being able to get a global understanding of a project, finding the best way to achieve final goal taking into account specific constraint and caring of choices consequences.

I'm an Open Source believer.

Experience

- | | | |
|-----------------------------|--|---------------------|
| <i>Aug 2018</i> | Cloud & DevOps Architect | Freelance |
| | <ul style="list-style-type: none">• Support customer defining and implementing OpenShift production architecture on AWS and on hybrid cloud (on premise and Azure).• Implementation of automation (Terraform, Ansible), CI (Jenkins) and ramping up of teams skills.• Customers : Sopra Steria, Storengy | |
